Allowable Subject Matter

Claims 1, 2, 5-9, 12-19 and 21-24 are allowed.

The following is an examiner's statement of reasons for allowance: Dubrovin (US 6,901,121) discloses a DC offset compensation circuit and a non-linear impairment compensation circuit in figure 4. The impairment compensation circuit 102 corrects for voltage offsets due to a gain mismatch and is not a frequency offset estimator as stated in claims 1, 2, 5, 6, 17-19, 21 and 22. Mattisson (US 6,104,238) discloses a frequency offset estimator and DC offset estimator in figure 2 but does not disclose the DC offset estimator outputting a signal to the frequency-offset estimator as claimed. Nafie (US 2001/0033601) discloses receiving a DC offset and outputting a frequency offset but does not disclose the limitations stated in claims 14-16, 23 and 24. Lisenbee (US 6,907,235) discloses the circuit of figure 9 that receives a packet (column 9, lines 47-52) and comprises a DC offset estimator and a residual DC offset estimator. Lisenbee does not disclose the at least one estimator and the at least another one of a plurality of offset estimators as stated in claims 7-9, 12 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
